ANALYTIC SUBJECT INDEX

Age-structured systems
– A first passage time problem for physicochemical systems with age structure - Vlad and Popa **142A** (1987) 579

bcc alloys
– Phase diagrams of— - Bell **142A** (1987) 22
bcc binary alloy (see *Phase transitions*) **142A** (1987) 321
Bimolecular reactions
– The probability of the jump-diffusion-controlled reaction of a species pair - Bondarev **142A** (1987) 273
Bogolyubov method (see *Lepton plasma*) **142A** (1987) 157
Brownian motion, two-dimensional
– Hydrodynamics and Brownian motion in thin sheets - Serra and Rubí **142A** (1987) 342
Brownian particles (see *Collision operator, Boltzmann*) **142A** (1987) 441
Burgers equation
– The generalized—in viscoanelastic media with memory - Ciancio and Restuccia **142A** (1987) 309

Chaos (see *Dissipative systems*) **142A** (1987) 75
Charged particle, heavy (see *Electron distribution, non-linear*) **142A** (1987) 548
Cluster variation method
– Second Hessian determinant as the criterion for order (first or second) of phase transition - Kikuchi **142A** (1987) 321
Coarse-graining (see *Markovian jump process*) **142A** (1987) 122
Collective mode damping
– Dynamical aspects of phonon–phonon coupling in— - Cataldo et al. **142A** (1987) 498
Collision operator, Boltzmann
– An improved differential form of the Boltzmann collision operator for a Rayleigh gas (or Brownian particles) - Ferrari **142A** (1987) 441
Collision rates (see *Harmonic oscillators*) **142A** (1987) 517
Collision superoperator
– —in the subdynamics approach of inhomogeneous systems - Škarka **142A** (1987) 405
Correlation functions (see *Kinetic theory, linear*) **142A** (1987) 245

Density of a liquid (see *Oscillating-body viscometers*) **142A** (1987) 53
Diffusion equation, non-Markovian (see *Transport processes*) **142A** (1987) 563
Dimer coverings (see *Heisenberg systems, antiferromagnetic*) **142A** (1987) 360
Dipole approximation (see *Radiation–matter interaction*) **142A** (1987) 601
Dispersion relations
– A non-linear response theory. II. Generalised— - Hassan et al. **142A** (1987) 619
Dispersive medium (see *Polarization of a plasma*) **142A** (1987) 135
Dissipative coupling (see *Harmonic oscillators*) **142A** (1987) 517
Dissipative systems
– Perturbation theory analysis of chaos. I. Transition from quasiperiodicity to chaos - Shimizu **142A** (1987) 75

Dissipative waves, non-linear (see *Viscoanelastic media*) **142A** (1987) 309
Distribution functions, reduced
– Enskog renormalization in linear kinetic theory - Cichocki **142A** (1987) 245

Electron distribution, non-linear
– Non-linear electron distribution around a heavy charged particle - Biswas **142A** (1987) 548
Electron–neutrino system (see *Lepton plasma*) **142A** (1987) 157
Electroweak interactions
– Kinetics of a lepton plasma in the standard model of— - Semikoz **142A** (1987) 157
Enskog renormalization
– —in linear kinetic theory - Cichocki **142A** (1987) 245
Entropy evolution (see *Self-organization processes*) **142A** (1987) 390
Entropy (see *Hard-point gas*) **142A** (1987) 1
Errata
– Classifying first-order phase transitions - Fisher and Milton **142A** (1987) 649
– Correlation and nuclear magnetic relaxation times - McConnell **142A** (1987) 650
Evolution superoperator
– Dynamical factorization of the—in inhomogeneous systems - Škarka **142A** (1987) 424
External noise (see *Fluctuating parameters*) **142A** (1987) 532
Extinction theorem, optical
– A non-linear response theory. I. General formulation - Obada et al. **142A** (1987) 601

Fe–Al alloys (see *bcc alloys*) **142A** (1987) 22
Fermion matter, thermally excited
– Two phonon induced single particle widths in thermally excited fermion matter - Hernández and Cataldo **142A** (1987) 517
Fe–Si alloys (see *bcc alloys*) **142A** (1987) 22
Feynman–Kac theory (see *Multistable systems*) **142A** (1987) 103
First passage time problem
– A—for physicochemical systems with age structure - Vlad and Popa **142A** (1987) 579
Fluctuating parameters
– Positivity requirements on— - Sancho et al. **142A** (1987) 532
Fluctuation–dissipation relations
– Irreversibility and— - Klimontovich **142A** (1987) 374
Fokker–Planck equation
– Exact solutions of the—for the Malthus–Verhulst model - Brey et al. **142A** (1987) 637
Fokker–Planck operator
– On the eigenfunctions of the—and of its adjoint - Ryter **142A** (1987) 103
Frequency dependent friction (see *Metastable state, decay of*) **142A** (1987) 178

Hamiltonian structures (see *Korteweg–de Vries equation*) **142A** (1987) 199
Hard-point gas
– Nonunitary transformations and hydrodynamic limit in the one-dimensional— - Elskens **142A** (1987) 1
Hard spheres (see *Kinetic theory, linear*) **142A** (1987) 245
Harmonic oscillators
– Two phonon induced single particle widths in thermally excited fermion matter - Hernández and Cataldo **142A** (1987) 517
Harmonic oscillators, quantal (see *Phonon–(two-particle–two-hole) coupling*) **142A** (1987) 498
Heisenberg systems, antiferromagnetic
– A mechanism for symmetry breaking in antiferromagnetic Heisenberg systems - Iske and Caspers **142A** (1987) 360

Hessian determinant
– Second—as the criterion for order (first or second) of phase transition - Kikuchi **142A** (1987) 321
Hierarchies (see *Korteweg–de Vries equation*) **142A** (1987) 199
Hydrogen spectrum (see *Two-body equation*) **142A** (1987) 488

Induced electric charge (see *Neutrino charge*) **142A** (1987) 135
Inhomogeneous systems
– Collision superoperator in the subdynamics approach of— - Škarka **142A** (1987) 405
– Dynamical factorization of the evolution superoperator in— - Škarka **142A** (1987) 424
Integrable nonlinear systems (see *Korteweg–de Vries equation*) **142A** (1987) 199
Irreversibility
– —and fluctuation–dissipation relations - Klimontovich **142A** (1987) 374
Irreversible processes (see *Inhomogeneous systems*) **142A** (1987) 405
Irreversible processes (see *Inhomogeneous systems*) **142A** (1987) 424
Ising model, ferromagnetic
– Derivation of the master equation from the path probability method - Wada et al. **142A** (1987) 38

Jump diffusion (see *Species pair in a matrix*) **142A** (1987) 273

Kinetic theory, linear
– Enskog renormalization in linear kinetic theory - Cichocki **142A** (1987) 245
Kinetic theory (see *Bimolecular reactions*) **142A** (1987) 273
Kinetic theory (see *Lepton plasma*) **142A** (1987) 157
Kolmogorov mixing
– Nonunitary transformations and hydrodynamic limit in the one-dimensional hard-point gas - Elskens **142A** (1987) 1
Korteweg–de Vries equation
– Lattice equations, hierarchies and Hamiltonian structures - Wiersma and Capel **142A** (1987) 199

Lamb–Retherford experiment (see *Nyquist formula*) **142A** (1987) 374
Laser, single mode dye (see *Fluctuating parameters*) **142A** (1987) 532
Lattice equations (see *Korteweg–de Vries equation*) **142A** (1987) 199
Lepton plasma
– Kinetics of a—in the standard model of electroweak interactions - Semikoz **142A** (1987) 157
Lorenz model (see *Dissipative systems*) **142A** (1987) 75

Magnetic moment (see *Two-body equation*) **142A** (1987) 488
Malthus–Verhulst model
– Exact solutions of the Fokker–Planck equation for the— - Brey et al. **142A** (1987) 637
Markovian jump process
– Multistable systems with moderate noise: coarse-graining to a—and evaluation of the transition rates - Ryter and Meyr **142A** (1987) 122
Master equation (see *Ising model, ferromagnetic*) **142A** (1987) 38
Memory effects (see *Viscoanelastic media*) **142A** (1987) 309
Metastable state, decay of
– Decay of a metastable state: a variational approximation - Freidkin et al. **142A** (1987) 178
Multistable systems
– On the eigenfunctions of the Fokker–Planck operator and of its adjoint - Ryter **142A** (1987) 103
– —with moderate noise: coarse-graining to a Markovian jump process and evaluation of the transition rates - Ryter and Meyr **142A** (1987) 122
Muonium spectrum (see *Two-body equation*) **142A** (1987) 488

Neutrino charge
– Induced electric charge of the neutrino in a dispersive medium - Oraevsky and Semikoz **142A** (1987) 135
Neutrino–electron system (see *Lepton plasma*) **142A** (1987) 157
Noise, moderate (see *Multistable systems*) **142A** (1987) 103
Noise, moderate (see *Multistable systems*) **142A** (1987) 122
Nonunitary transformations (see *Hard-point gas*) **142A** (1987) 1
Nyquist formula
– Irreversibility and fluctuation–dissipation relations - Klimontovich **142A** (1987) 374
1/N expansion (see *Polaron, optical*) **142A** (1987) 555

Open systems (see *Self-organization processes*) **142A** (1987) 390
Oscillating-body viscometers
– On the theory of— - Nieuwoudt et al. **142A** (1987) 53

Pair distribution function (see *Electron distribution, non-linear*) **142A** (1987) 548
Path probability method
– Derivation of the master equation from the— - Wada et al. **142A** (1987) 38
Perturbation theory (see *Polaron, optical*) **142A** (1987) 555
Phase diagrams (see *bcc alloys*) **142A** (1987) 22
Phase transitions
– Second Hessian determinant as the criterion for order (first or second) of phase transition - Kikuchi **142A** (1987) 321
Phonon–phonon coupling
– Dynamical aspects of—in collective mode damping - Cataldo et al. **142A** (1987) 498
Phonon–(two-particle–two-hole) coupling
– Dynamical aspects of phonon–phonon coupling in collective mode damping - Cataldo et al. **142A** (1987) 498
Physicochemical systems
– A first passage time problem for—with age structure - Vlad and Popa **142A** (1987) 579
Polarization of a plasma
– Induced electric charge of the neutrino in a dispersive medium - Oraevsky and Semikoz **142A** (1987) 135
Polaron, optical
– Perturbation theory for the multidimensional polaron - Seljugin and Smondyrev **142A** (1987) 555
Positivity requirements (see *Fluctuating parameters*) **142A** (1987) 532
Positronium spectrum (see *Two-body equation*) **142A** (1987) 488

Quantal Brownian motion
– Two phonon induced single particle widths in thermally excited fermion matter - Hernández and Cataldo **142A** (1987) 517
Quantum electrodynamics, bound-state
– A new approach to bound-state quantum electrodynamics. I. Theory - Barut and Ünal **142A** (1987) 467
– A new approach to bound-state quantum electrodynamics. II. Spectra of positronium, muonium and hydrogen - Barut and Ünal **142A** (1987) 488
Quantum tunnelling (see *Metastable state, decay of*) **142A** (1987) 178
Quasiperiodicity (see *Dissipative systems*) **142A** (1987) 75

Radiation–matter interaction
– A non-linear response theory. I. General formulation - Obada et al. **142A** (1987) 601
– A non-linear response theory. II. Generalised dispersion relations - Hassan et al. **142A** (1987) 619

Random walk, one-dimensional
– Non-Markovian diffusion-like equation for transport processes with anisotropic scattering - Cáceres and Wio **142A** (1987) 563
Random walk (see *First passage time problem*) **142A** (1987) 579
Random walks (see *Species pair in a matrix*) **142A** (1987) 273
Rayleigh gas (see *Collision operator, Boltzmann*) **142A** (1987) 441
Reaction probabilities (see *Bimolecular reactions*) **142A** (1987) 273
Recursion operator (see *Korteweg–de Vries equation*) **142A** (1987) 199
Response theory, non-linear
– A non-linear response theory. I. General formulation - Obada et al. **142A** (1987) 601
– A non-linear response theory. II. Generalised dispersion relations - Hassan et al. **142A** (1987) 619

S-theorem
– Entropy evolution in self-organization processes. *H*-theorem and— - Klimontovich **142A** (1987) 390
Scattering, anisotropic (see *Transport processes*) **142A** (1987) 563
Self-organization processes
– Entropy evolution in—. *H*-theorem and *S*-theorem - Klimontovich **142A** (1987) 390
Species pair in a matrix
– The probability of the jump-diffusion-controlled reaction of a species pair - Bondarev **142A** (1987) 273
Strong coupling (see *Polaron, optical*) **142A** (1987) 555
Structure factor (see *Electron distribution, non-linear*) **142A** (1987) 548
Subdynamics approach
– Collision superoperator in the—of inhomogeneous systems - Škarka **142A** (1987) 405
Subdynamics (see *Inhomogeneous systems*) **142A** (1987) 424
Symmetry breaking (see *Heisenberg systems, antiferromagnetic*) **142A** (1987) 360

Transport processes
– Non-Markovian diffusion-like equation for—with anisotropic scattering - Cáceres and Wio **142A** (1987) 563
Tricritical point (see *Hessian determinant*) **142A** (1987) 321
Two-body equation
– A new approach to bound-state quantum electrodynamics. I. Theory - Barut and Ünal **142A** (1987) 467
– A new approach to bound-state quantum electrodynamics. II. Spectra of positronium, muonium and hydrogen - Barut and Ünal **142A** (1987) 488
Two-dimensional fluid
– Hydrodynamics and Brownian motion in thin sheets - Serra and Rubí **142A** (1987) 342
Two-level atoms (see *Radiation–matter interaction*) **142A** (1987) 601
Two-level atoms (see *Radiation–matter interaction*) **142A** (1987) 619

Van der Pol oscillator (see *Self-organization processes*) **142A** (1987) 390
Variational approximation (see *Metastable state, decay of*) **142A** (1987) 178
Velocity autocorrelation function (see *Brownian motion, two-dimensional*) **142A** (1987) 342
Velocity autocorrelation function (see *Transport processes*) **142A** (1987) 563
Viscoanelastic media
– The generalized Burgers equation in—with memory - Ciancio and Restuccia **142A** (1987) 309
Viscosity of a liquid (see *Oscillating-body viscometers*) **142A** (1987) 53

Weak coupling (see *Polaron, optical*) **142A** (1987) 555
